That's when the San Francisco 49ers took a chance on Colin Kaepernick, signing him to a four-year, \$40 million deal less than six months ago. He had

been considered a sleeper entering the 2012 NFL draft -- sometimes being mocked to Denver as a potential No. 1 overall pick -- but San Francisco had already drafted a quarterback, Alex Smith. Kaepernick was not a sure thing, coming off his junior year at Nevada after the Colin Kaepernick Bandit, a YouTube sensation when the quarterback was completing at least one pass in almost every game, broke up. But the 49ers didn't see another option. So they signed Kaepernick to play

behind Smith. Kaepernick led the 49ers to the postseason last year, helping lead San Francisco to its first playoff victory since 2002 in the second round. "You saw a kid who was playing with some pretty good talent and so nothing was out of the question," said 49ers coach Jim Harbaugh. "And he's a great kid." It's only a matter of time before Kaepernick starts, potentially this season. But the athleticism is there and the arm strength, the dual-threat ability that offensive

coordinator Greg Roman likes. The belief is the team will hold him back to prevent any injuries. But that could mean the guy who led a nearly 50-point comeback at home against Seattle in Week 10 could make his first start this season. "He's going to get some snaps here, but I don't think that's where you want to start him," Harbaugh said. "I think you want to give him a little bit of seasoning to help him grow up. But he's getting better and better every day.... The talent's pretty obvious for

him. He's going to make some plays for us." Kaepernick won't be the first rookie quarterback to make an impact, though. Jared Goff, picked second overall by the Rams, led the Los Angeles Rams to a NFC West title and is the favorite to win the rookie of the year award over Kansas City Chiefs quarterback Alex Smith.
