Located in the northern Negev desert near the Gaza Strip, it falls under the jurisdiction of Eshkol Regional Council. History The village was founded in 1952, and named after Zafon, a leader of the Yam Tov movement, on its land. Its name was changed to Baal Zafon in 1957, to avoid confusion with the town of the same name in western Galilee. At first, the moshav was located within the boundaries of the Palmach military organisation in the Negev, but later became a member of the Jewish paramilitary organization Haganah. Baal Zafon is a small farming community. Since the 1960s, it has been headquarters of the Bedouin community. The moshav's inhabitants are mostly farmers, who also engage in raising sheep and goats. It is also home to a local secondary school, a mobile home park, a few businesses, and a community event hall, which is used mostly for social gatherings. In August 1997, a number of alders in the nearby Arab village of Abu Ghannam were burned. While Amazon's sales continue to grow across the country, it's the makeup of shoppers they attract that's changing. At the start of the new holiday season last month, Amazon had shifted 1.5 million items from stores to its online store, accounting for about 6 percent of all online shopping done nationwide. That's up from 1.3 million items in 2016, according to a

report released last month by data tracking firm Accenture and The NPD Group. At that same time last year, online spending was about 7 percent of total holiday spending, according to NPD. As shoppers' appetite for shopping online grows, they're increasingly attracted to retailers that offer the convenience of online orders and delivery. How that plays out for physical stores is something to watch — in a good way. Getty Images Traditional brick-and-mortar retail is growing over time. The number of retailers and restaurants with two or more locations stood at 11.1 million in 2016, marking an increase of 48.5 6d1f23a050
